TAKE NOTE

TIER 1 SUPPORT- POWER, NETWORK AND SOUND OF MOBILE AND FIXED SYSTEMS WILL BE MANAGED BY HEAD OPERATORS AND OPERATORS ON GROUND.
ISSUES RAISED ON REGIONAL GROUPS
Monitors help troubleshoot as far as possible.

TIER 2 SUPPORT- page 20

**1. FIXED INSTALLATION @ SCHOOL
PXLS1_14598(PAARL GIM HOCKEY)**

Fixed installations have the name of school in the system name.

**2. MOBILE SYSTEM USED @ DIFFERENT VENUES AND ARE SET UP BY AN OPERATOR
PXLS1_32558(JHB SYSTEM 9)**

Mobile systems usually have the province labelled in the system name.

3. **S3:** Can't control the sound- it's built into the system.

4. **SOLO:** Can't track and also can't control sound.

5. **CRICKET:** Fixed on center and does not track. No sound

S1 and S3 tracks the play and presets can be used to stop tracking (usually with penalty shootouts in Football and Hockey, can also be used when Netball and Water Polo should have a fixed frame.

EVENT CREATION

FORMAT: SPORT: U(age)(level) SCHOOL VS U(age)(level) SCHOOL
Example: HOCKEY: U19A HS GARSFONTEIN VS U19A CORNWALL
HILL COLLEGE

Checklist for Event Creation:

1. Correct Sport: WATER POLO not WATERPOLO
FOOTBALL not SOCCER
2. Correct Spacing: SPORT: not SPORT :
3. Both teams in the title should either have age group and level (U19A)
or age group only (U19)
4. EVERYTHING IN ALL CAPS!
5. School names should match the school name on the scoreboard and
the teams loaded on the CMS
6. Not 1st or 2nd team, we use U19A or U19B

All CMS fixtures should have a minimum of 3 minutes gap between the end time of the previous game and the start of the following game.

If SportVot is not selected- Event needs to be deleted and recreated by selecting SportVot.

MONITORING YOUR OWN STREAM

FIND PROBLEMS BEFORE SUPERSPORT SCHOOLS DOES!!

You are tasked to monitor all elements of the stream:

- Tracking
 - Graphics
 - Sound
 - Quality
 - Online/ Offline systems
- Real-time monitoring
 - Checking all elements of your live stream every 10 minutes
 - Ensure timely detection of all issues.

When operating, please monitor your own stream every few minutes to make sure of the following:

- Your system is online.
- You have the correct team names and spelling
- The correct logos are added
- Ads are loaded
- Your stream is not too bright/ dark (raise on your regional group and head operators on shift will raise a ticket)

ADJUSTING EVENT TIMES

- There is a 10-minute block before the start of an event.
- This means that you can adjust the event start time up to 10 minutes before the start of the event.
- If you are within 10 minutes of the event start time, the start time cannot be adjusted.
- The end time of an event can be adjusted up to 1 min before the end of the event.

ID	Name	Sport	Teams	Stream	Start Time	End Time	Permission	System	Version	Ac
☐	SPORTING LAGOS FC VS GOMBE UNITED - NPFL LIVE		SPORTING LAGOS FC GOMBE UNITED FC	HD	02.10.2023 16:00	02.10.2023 19:16	club	--- PXL_P_00228 (LAGOS SOCCER)	3.7.8	

FIXTURES STARTING EARLY

If a fixture has been moved to start earlier than the original time, there are two scenarios that can occur:

You become aware of the earlier start time outside of the 10-minute block

Due to this change being outside of the 10 minute change block, you can simply adjust the start and end times of your event. For back to back events, you will work from the **first event, down to the last event**.

You become aware of the earlier start time within the 10-minute block

There is nothing that can be done. The beginning of your first event will be missed. You can, however, adjust the start and end times of any games to come.

FIXTURES STARTING LATE

If the first fixture of the day has been moved to start later than the original time, there are two scenarios that can occur:

You become aware of the later start time outside of the 10-minute block

You can adjust the start and end times of your events, but you will need to work **backwards-from the last event up**. If you work from the top, down, the fixture times will overlap, and your events may get deleted.

You become aware of the later start time within the 10-minute block

You will follow the same process as above, working **backwards- from the last event up**. You will adjust the start and end times of all your upcoming events except the first event. You will not be able to adjust the start time of your first event due to the 10-minute block. You will, however, be able to adjust its end time.

Unlist the first event and adjust its end time so that it ends 1 minute after the start time. If it has already gone live, then unlist the event and adjust the end time so that it ends in 1 minute time. Once the first event has ended, you will then need to recreate an event for the first fixture using the new start and end times.

FIXTURES RUNNING LATE

At half time of each game, check whether the fixtures are running on time and decide to adjust the start times of the games to come, and the end time of the current game.

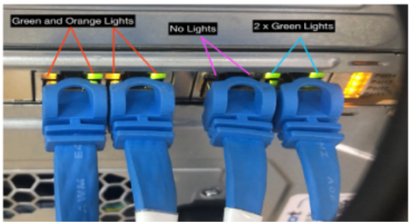

Work backwards from the last event up and adjust the start and end times of the fixtures based off the time delay.

TROUBLESHOOTING

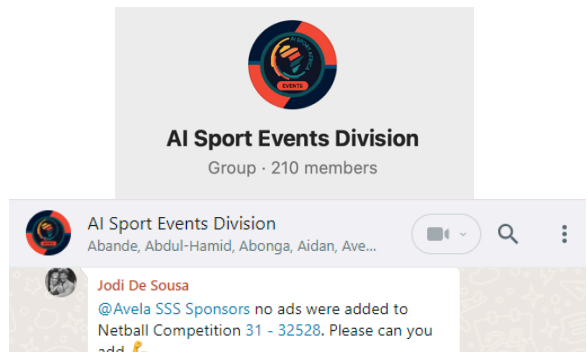

NETWORK

PROBLEM:	APPLICABLE TO SYSTEM:	SOLUTION:
No internet and router/bonded unit not working	S1 (Mobile and Fixed), S3, Solo, Cricket	1. Do a speed test. I would swap 1&2, 2. Restart Router (Unplug, wait 30 seconds, plug back in) (Occasionally if the router is hard rebooted then unplugged works with signal issues.) 3. Plug ethernet cable running from school network into VPU. (Plug out and swap ends of ethernet cable from router/school network into VPU) 4. Remove SIM card and place in phone. ● Check the data (this should be picked up if there is internet, if you are connected it will say there is no data) ● Go to settings. ● SIM card ● Disable it. ● Mobile- SIM PIN – disable. ● Put back in router. 5. Swap SIM 1 and 2 with each other

		6. Wait for router to cool down, could have overheated
No internet	S1 (Mobile and Fixed), S3, Solo, Cricket	1. Reboot VPU: ● Hold the power button (at the front of the VPU) until it turns off. ● Give it a few seconds. ● Turn VPU back on ● Can also unplug VPU, wait 30 seconds, plug back in
“The media playback was aborted due to a corruption problem or because the media used features your browser did not support”	S1 (Mobile and Fixed), S3, Solo, Cricket	Network- refresh your browser
System going offline and online – camera connections	S1 (Mobile and Fixed)	Open the VPU box and make sure all the lights are on- shining orange and green. Check back of VPU for the 4 Solid orange lights as well as the flashes on the connections which should flash green and dark orange. Restart VPU (Start with this one) Can “Blow” in cable connection port and on cables, sometimes dust gets in there. Also check that all connections where “Blue” cables and extenders meet, are good. Plug blue cables directly into VPU, to determine if its a port or cable issue.

		 Green and Orange – internet connection of 1 Gbps Green and Green – internet connection of 100 Mbps No lights – no connection
	S3	This often happens so just reboot 2 or 3 times
	SOLO	
	Cricket	This colour will be different to the rest - green and green but move around in ports and try them all then reboot. Also swap cable ends around at VPU and CHU
Bad network and stream keep on dropping	S1 (Mobile and Fixed)	Unlist the game until the network is better. (Attempt to reboot at least 3 times every +- 8 minutes and then if that does not work then we unlist up until stream quality improves)
	S3	Unlist the game until the network is better.
	SOLO	Unlist the game until the network is better.

	Cricket	Unlist the game until the network is better.
GRAPHICS		
No graphics showing	S1 (Mobile and Fixed)	1. Make sure your scoring link is started. 2. Restart Graphics (OPEN VPU MANAGER>VENUE TOOLS> MAINTENANCE>PRESS RUN GRAPHIC RESETS AND MONITOR STREAM IF GRAPHICS COME BACK) (Sometimes this needs to be done more than once) 3. Check that “Show Blank” has not been selected under Overlay Controls. 4. Graphics not coming back, open a ticket with tier 2 support.
	S3	1. Make sure your scoring link is started. 2. Restart Graphics 3. Graphics not coming back, open a ticket with tier 2 support. 4. Check that “Show Blank” has not been selected under Overlay Controls.
	SOLO	1. Make sure your scoring link has been started. 2. If it has, and no graphics appear, RESTART GRAPHICS in VPU Manager. 3. Once graphics has been processed and restarted, close current scoring link and reopen

		[copy and paste] and graphics should appear 4. Check that “Show Blank” has not been selected under Overlay Controls. 5. If not, raise a ticket with tier 2 support
	Cricket	1. Check if scorelink has been started 2. Restart Graphics 3. Check that “Show Blank” has not been selected under Overlay Controls (THIS IS VITAL FOR NEW SSS DETAILED SCORING THEME AS “SHOW BLANK” IS THE DEFAULT SETTING. 4. Raise a ticket with Tier 2 Support.
		First check if ads have been allocated or not (Can ask on regional group or monitoring surveillance group for this to be checked) Post a message on AI Sport Events Division WhatsApp group, tagging Avela and PK that sponsors have not been allocated with that specific CLUB NAME. REMEMBER-TAG AVELA AND PK 

Wrong Theme/Template SHOULD CLICK ADD MORE TO GET CORRECT SCOREBOARD	S1 (Mobile and Fixed)	Use Premiere Blue or new SSS. If the wrong theme is selected, change in scoring link under settings.
	S3	Use Premiere Blue or new SSS. If the wrong theme is selected, change in scoring link under settings.
	SOLO	Use Premiere Blue or new SSS. If the wrong theme is selected, change in scoring link under settings.
	Cricket	Use SSS BASIC OR DETAILED for all ODI/T20 formats, TEST/TIME format will be “Pixellot Template (TEST)” and select TEST format.
When play is stopped due to weather	S1 (Mobile and Fixed), S3, Solo, Cricket	Insert weather banner. • Use sticky toggle at bottom left corner in SportVot. We need to confirm that SSS have added this as they don't if not asked
SCORING		
Scoreboard not showing	S1 (Mobile and Fixed)	1. Make sure the operator has started the scoreboard. 2. Make sure the scoreboard type is not blank. 3. Reset Graphics (OPEN VPU MANAGER>VENUE TOOLS> MAINTENANCE>PRESS RUN GRAPHIC RESETS AND MONITOR

		STREAM IF GRAPHICS COME BACK 4. If it's still not appearing- open a ticket with tier 2 support. Could also be network related.
	S3	
	SOLO	(Tennis- Take Note) Doubles Tennis will have the school name listed twice. Singles Tennis will have school names listed once. 
	Cricket	1. Make sure the scoreboard is started. 2. Reset graphics. 3. Raise a ticket with Tier 2 Support Cricket Basic Scoring >> Pixellot Template >> Test 

		Cricket Basic Scoring >> SSS Theme >> T20/ODI 
SPORTS USING SCORE	Rugby Football Netball Water Polo Hockey	Can this just be checked during play to make sure nothing covers it and if it does ask Marizen or Vusi and then change to score big   
SPECIAL SCOREBOARDS	Basketball Cricket	Cricket Basic Scoring >> Pixellot Template >> Test 

		Cricket Basic Scoring >> SSS Theme >> T20/ODI 
TRIGGER GETTING STUCK (TRY BANNER)	S1 (Mobile and Fixed)	On sportvot make sure it goes back to score, by clicking SCORE. Can also “unselect” what it is currently stuck on
	S3	On sportvot make sure it goes back to score, by clicking SCORE. Can also “unselect” what it is currently stuck on
	SOLO	On sportvot make sure it goes back to score, by clicking SCORE. Can also “unselect” what it is currently stuck on
	Cricket	FOUR/SIX banner not going away after a few seconds: 1. Right click & open scoring link 2. Access URL and go to SPORTVOT. 3. Click “open overlay control”. 4. Select “SHOW BLANK” 5. Check network, could cause scoreboard to not stay up to date

SOUND

Explanation	S1 (Mobile)	2-port for ambient sound 4-port soundbox used for commentary  
	S1 (Fixed)	Telemedia will need to advise
	SOLO	Can't change ambient sound- Sound comes through the camera, if the camera is on there should always be sound.
	S3	Operator can't change sound- sound gets changed by support to lower or increase
	Cricket	Going with no sound until further notice
Buzzing noise	S1 (Mobile)	1. Make sure sound box cables not touching anything metal. 2. Swap mic 1 and 2 - Take out one of the mics, if that doesn't work, swap it around. (Take out mic 2 and assess if buzzing noise has disappeared. If it has not , place mic 1 into input 2. If that does not work, repeat the process with mic 2 into input 1 first)

		3. 4-Port soundbox: Turn knob 1 and 2 to 11 o'clock. Turn knobs 3 and 4 to 1 o'clock. 4. Unplug all sound, wait a while, plug back in Check extender 5/mic to ensure plugged in correctly  
ONE CHANNEL HAS STATIC/HUMMING, OTHER HAS SOUND	S1 (Fixed)	Same as above for most fixed systems (those using Beringer sound box)
	S1(Mobile)	Pull out left mic from input 2. (Assess which side has buzzing sound and depending on which side (left/right) you will pull out the mic based on buzzing sound. (left - input 1/right - input 2)
No sound	S1 (Fixed)	Same as above for most fixed systems (those using Beringer sound box)
	S1(Mobile)	

		1. Make sure volume is up. 2. Unplug and plug back in 3. V48 Switch is on at the back. V48- The on/off button of sound box
	S1 (Fixed)	Rubix 44 Soundbox: 1. Check if soundbox is on [lights] 2. Make sure soundbox is on. 3. Check knobs and buttons left to right and follow prompts: - Knob 1: SENS 1L turn to 14'00 o'clock - SENS 1L Button press ON [orange-red light flashing] - MIC/LINE: Ensure both mic inputs are inserted (Y-cable) - 1L Input & 2R input - Knob 2: SENS 2R turn to 14'00 o'clock - SENS 2R Button (48V), Press ON - Ignore THRS [COMP/LIMIT - Knob and button 3] - Knob & button 4: SENS 3L turn to 13'00 o'clock and press Hi-Z button ON [orange-red light flashing] - Ignore the rest of the MIC/LINE 3L; INPUT; 4R & SENS4R; 48V Button; and THRS COMP/LIMIT button and knob (used when commentary is needed)

		- DIRECT MONITOR: ½ Knob and ¾ Knob turn to 13'00 o'clock and press MONO button ON - OUTPUT (Silver knobs), turn to 13'00 o'clock
	SOLO	Sound is integrated into the SOLO. If no sound is outputted, raise and enquire.
	Cricket	Going with no sound until further notice.
NAMING/FIXTURES		
If not seeing the whole name of the school		The name of the school is too long, shorten it. • Top left score bug- use the first 3 letters of school name or logical abbreviation. • With score(big) use full name.
Using 1st or 2nd team in EVENTS NAMING	Should change to U19A (1st team) and U19B (2nd team)	When allocating teams to an event, only use school names, not age groups.
	Should never have age/teams(A/B) on the scoreboard!	NB. Important for netball to be spelt correctly as it is linked to the correct netball scoreboard.
CAMERA UNSTABLE		
Camera moving with the wind	S1 (Mobile)	Use ropes in the box to stabilize the camera.

		If you have to stabilise camera mid game you will need to open a ticket with tier 2 support for recalibration And Unlist event. Set up of ropes: • Attach ropes at the top of the tripod before sending it up. • Take note- ropes needs to be attached and camera set up before calibration. If CHU moved, you will have to send a ticket
	S1 (Fixed)	Contact Marizzen or Vusi, will need to raise with Erin and Telemedia
	S3	Same as S1 Mobile
	SOLO	Use ropes in box to stabilise camera (if it's on a tripod)
	Cricket	Use ropes in box to stabilise camera (if it's on a tripod)

TIER 2 SUPPORT

What gets raised with Tier 2:

- Tracking that's off(explain where the tracking was off- left of right) - Camera moved- Possible recalibration.
- No Graphics.(Only after you have checked the scorelink has been started and you have tried resetting the graphics via the VPUM)
- Scoreboard not updating/ Not allowing operator to score.
- The system is in reset during a game that's live, but if a system is in reset around the start time, don't panic, give it a few minutes to initialize.
- No Stream Path.
- Manual Scoreboard link not working- for presets.
- Scroll bar not scrolling.**(SHOULD ONLY BE SCROLLING IF YOU CAN'T SEE THE WHOLE EVENT AND TEAM NAMES)** Please note there is a character limit so if the whole title is under 50 characters then no scrolling takes place
- Team Names not updating on the scoreboard.

How to raise a ticket (Head Operators/ Monitors only)

Send an email to the AI Sport Africa support email address:

- support@aisport.africa
- The **subject** of your email becomes the title of the ticket. It must include:
 - System Name
 - Brief title of the issue
- The body of your email should describe the issue and contain any relevant details.

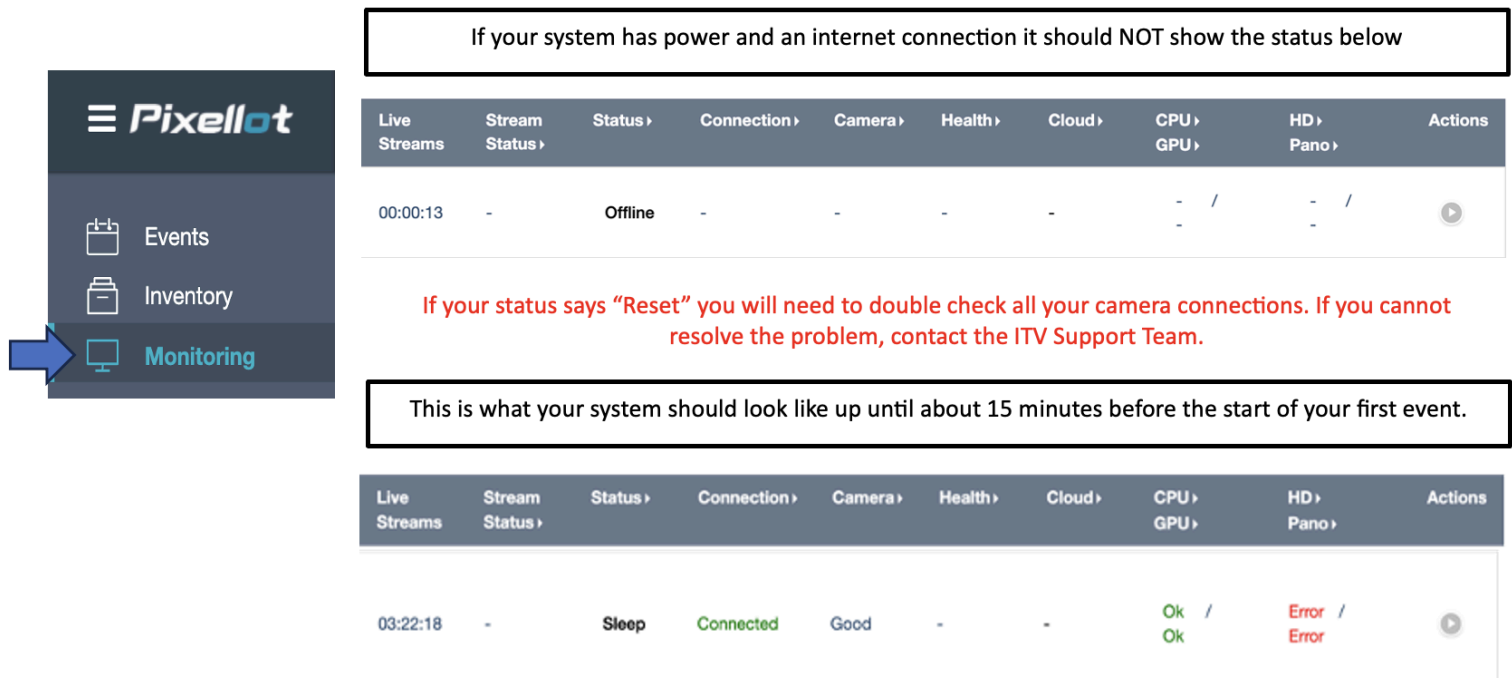

It's important to monitor your inbox and timeously respond to any requests/ communicate to the operator.

PK on events division group:

- Scroll bar having competition name and not event name.
- No ads allocated

STATUS OF SYSTEM

- Stream Status can be seen under the monitoring tab. (on knowledgebase under Mobile System: Pre Event)

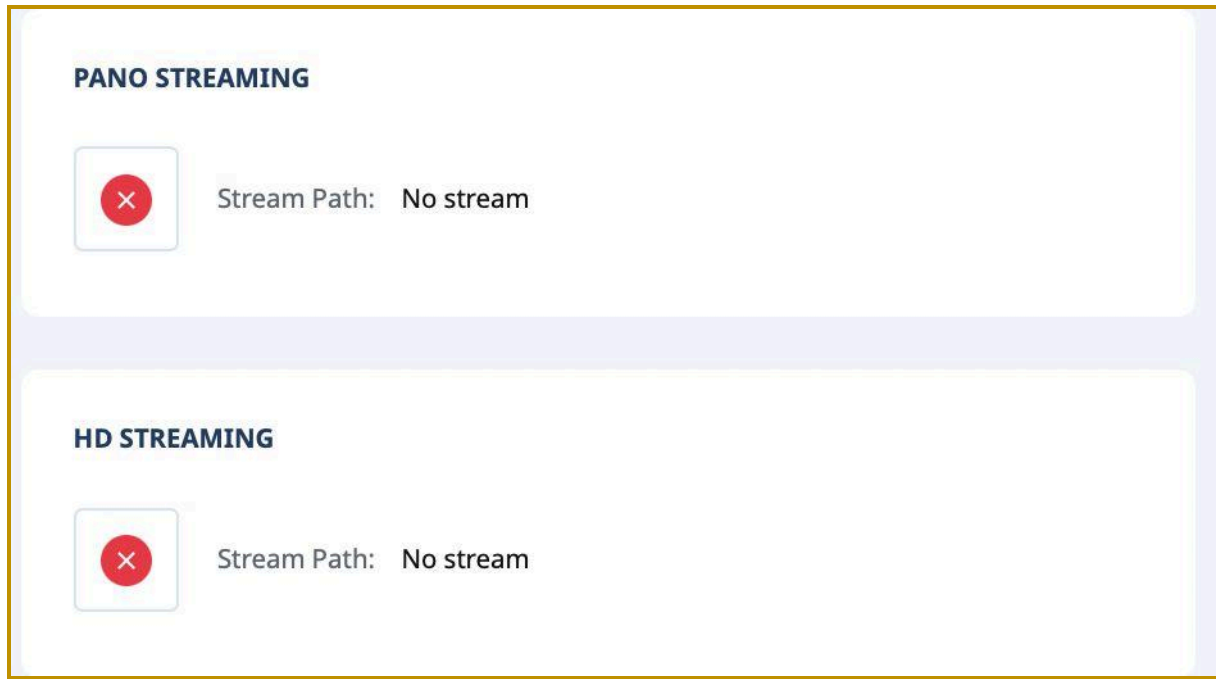

The screenshot displays the Pixellot monitoring interface. On the left, a sidebar contains three menu items: 'Events', 'Inventory', and 'Monitoring'. A blue arrow points to the 'Monitoring' item. The main content area features a table with system status information. Above the table, a note states: 'If your system has power and an internet connection it should NOT show the status below'. Below the table, another note reads: 'If your status says "Reset" you will need to double check all your camera connections. If you cannot resolve the problem, contact the ITV Support Team.' The table has columns for 'Live Streams', 'Stream Status', 'Status', 'Connection', 'Camera', 'Health', 'Cloud', 'CPU > GPU >', 'HD > Pano >', and 'Actions'. The first row shows a system that is 'Offline' with various status indicators in grey. The second row shows a system that is 'Sleep' with 'Connected' connection, 'Good' camera status, and 'Ok' CPU/GPU status, but 'Error' HD/Pano status.

Live Streams	Stream Status	Status	Connection	Camera	Health	Cloud	CPU > GPU >	HD > Pano >	Actions
00:00:13	-	Offline	-	-	-	-	- / -	- / -	
If your status says "Reset" you will need to double check all your camera connections. If you cannot resolve the problem, contact the ITV Support Team.									
This is what your system should look like up until about 15 minutes before the start of your first event.									
03:22:18	-	Sleep	Connected	Good	-	-	Ok / Ok	Error / Error	

- **Offline-** System is offline check power/internet
- **Reset before an Event-** No need to worry the VPU process is just starting up, will show live latest 1 min into the event (depending on how long ago it was scheduled ie 1 min before vs 10 mins before because the start up process does take some time before each event)
- **Reset During an Event-** Check the system for missing camera connections or anything else wrong physically. If everything looks fine raise a ticket and we'll look

- **Sleep-** Nothing to worry about. Usually the event is still not close enough to start the initialization process
- **Maintenance-** Usually when frames or calibrations are opened but should switch out of this mode once the event goes live. Wont switch into maintenance mode during an event which is why we can play with the brightness during an event in head set up. (sometimes systems get stuck in maintenance but doesn't happen very often anymore, just raise a ticket if the event has started and its still in maintenance)
- **Stuck-** Will show with a black dot instead of green. Happens sometimes when camera connections go missing during a live event. Or if cameras drop from 1 gig to 100 meg during an event
- **Red Dot-** usually means the system has gone offline/disconnected and the status will update 30ish seconds after to offline if the system has come back online again.
- **Green dot-** usually means everything is okay
- **Unavailable** - usually means that no stream path has been created for the event currently trying to go LIVE. If it does not go LIVE within 3-5min of it starting, it should be noted that there may be an issue with it finding a stream path.
 1. Confirm that it is still showing “unavailable” under monitoring.
 2. Open VPU manager [if system is online], and scroll down on the dashboard.[See figure]Confirm that no stream path has been populated
 3. Raise a ticket with support.

Example of no stream path:

NEED TO ADD WHAT TO DO TO GET IT BACK:

- ☐ CHECK CAMERA CONNECTIONS FIRST
- ☐ PERFORM PC RESET (UNDER MAINTENANCE)
- ☐ QUICKEST WAY IS TO RECREATE FIXTURE

Example of stream path populated:

PANO STREAMING

SCOREBOARDS

Knowledge Base (SportVot- Basic Scoring)

Two Types: **SCORE BIG** and **SCORE**

Score Big:

- Scoreboard Banner at the bottom of the stream (no time shown)
- Using full team names

Score :

- Scoreboard Banner is at the top left corner of the screen- showing a timer
- Using the first three letters of the team/school name.
- Used for: Football, Rugby, Hockey, Water Polo and Netball

Unique Scoreboards:

- Basketball
- Tennis
- Cricket

STREAM FORWARDING

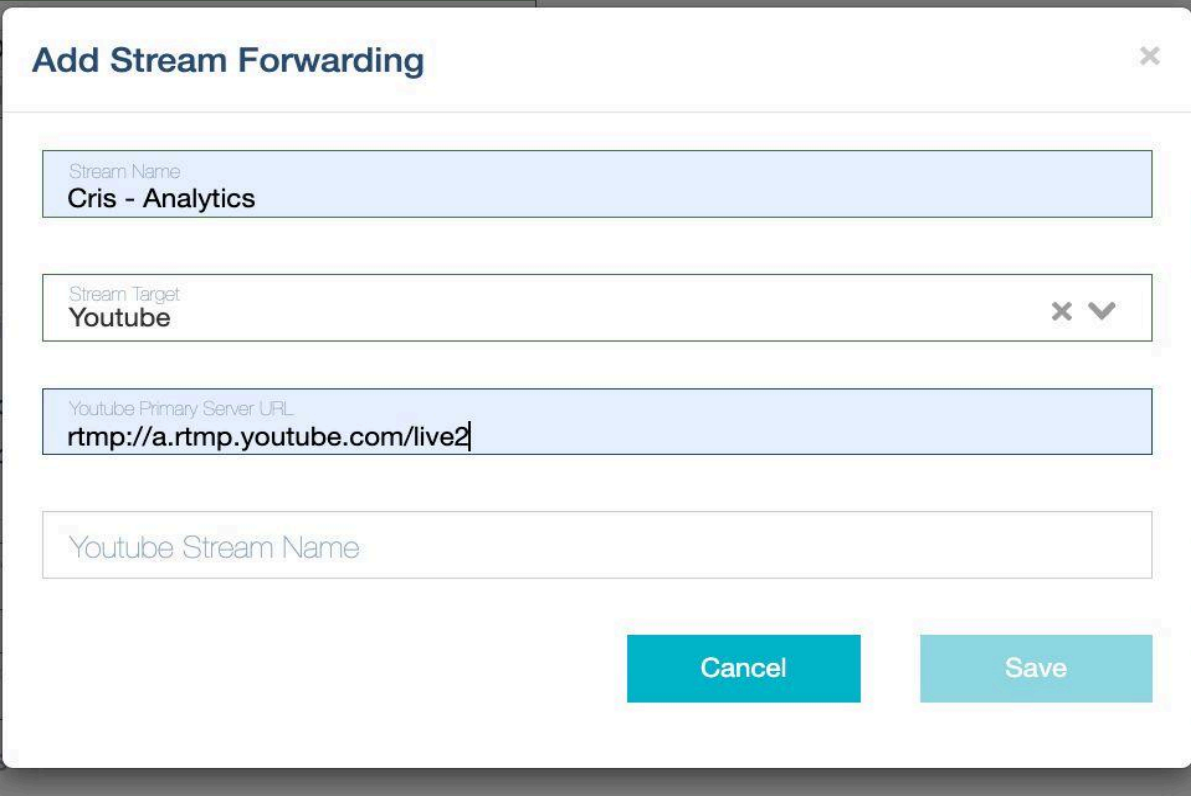

How to add a stream key

Stream name = Cris - Analytics

Stream Target = YouTube

YouTube Primary Server URL = `rtmp://a.rtmp.youtube.com/live2` (this will always stay the same)

Youtube Stream name = stream key

The screenshot shows a dialog box titled "Add Stream Forwarding" with a close button (X) in the top right corner. The dialog contains four input fields and two buttons at the bottom. The first field, labeled "Stream Name", contains the text "Cris - Analytics". The second field, labeled "Stream Target", contains a dropdown menu with "Youtube" selected and a close button (X) and a dropdown arrow (v). The third field, labeled "Youtube Primary Server URL", contains the text "rtmp://a.rtmp.youtube.com/live2". The fourth field, labeled "Youtube Stream Name", is empty. At the bottom right, there are two buttons: "Cancel" and "Save".

Field Label	Value
Stream Name	Cris - Analytics
Stream Target	Youtube
Youtube Primary Server URL	rtmp://a.rtmp.youtube.com/live2
Youtube Stream Name	

Buttons: Cancel, Save
