WEEKLY AVAILABILITY

On a Monday, on the operators WhatsApp group, a poll will be shared asking for availability over the upcoming week.

Based on your availability, you will be allocated to events and will receive this allocation via WhatsApp. Your allocation will include:

- The Event
- The Sport
- The Day
- The Camera Name
- The Club Name
- The Start time

Event Operators Schedule: 29-4 June							
Name	Event	Sport	Day	Camera Name	Club Name	Start Time	Graphics
Erin Christie	ST ANDREW'S VS ST STITHIANS	HOCKEY	Tuesday	PXLS1_18103 (St Andrews Hockey)	St Andrews Hockey	15:15	SportVot

All this information will be important for when you start creating your events on the CMS (Central Management System).

EVENT FIXTURES

After you have been allocated to an event, you will receive an e-mail containing the specifics of your event fixtures. The e-mail will include:

- Which fixtures you will be covering.
- The POC's (Person of Contact's) name and number.
- The sport
- The category and subcategory (if they are out of the ordinary)

Hi Erin

Please see attached your fixtures for St Andrew's hockey playing at St Andrew's.

Cristy Mullender

16:00	u14B	St Stithians
17:00	u15A	St Andrew's
17:00	u15B	St Stithians

CREATING EVENTS

In order to create fixtures on the CMS, you first need to be granted access to the club you will be selecting, and you need to create an account on the Pixellot website.

STEP 1: GAINING ACCESS TO THE CMS

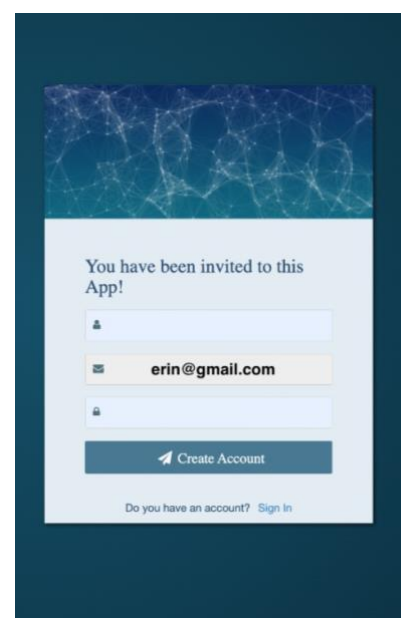

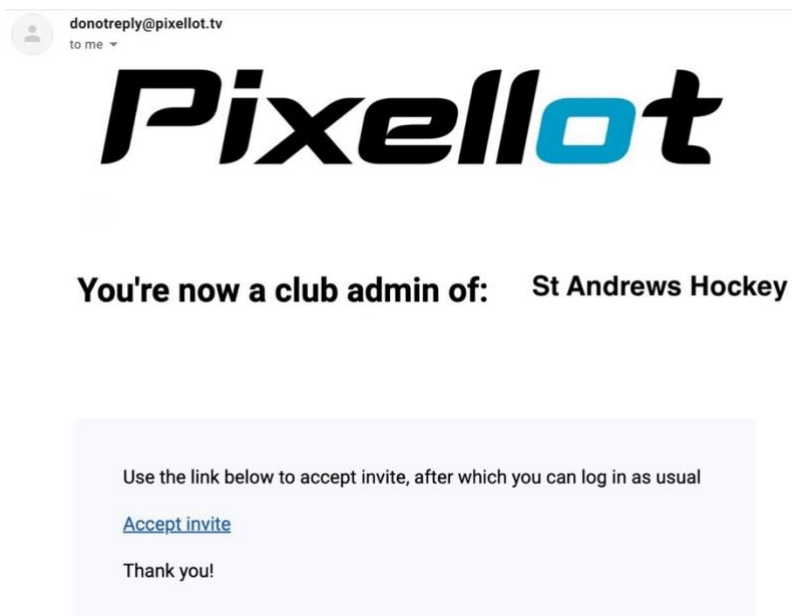

In order to be granted access to your selected club on the CMS, you need to fill in the *Operators Info Form* so that your details and e-mail address can be recorded. If you haven't automatically been granted access to the club, post a message on the WhatsApp group requesting access. The message must include the following information- which can be found on the event allocation sheet:

- The camera name
- The club name
- Your email address.

STEP 2: CREATING A PIRELOT ACCOUNT

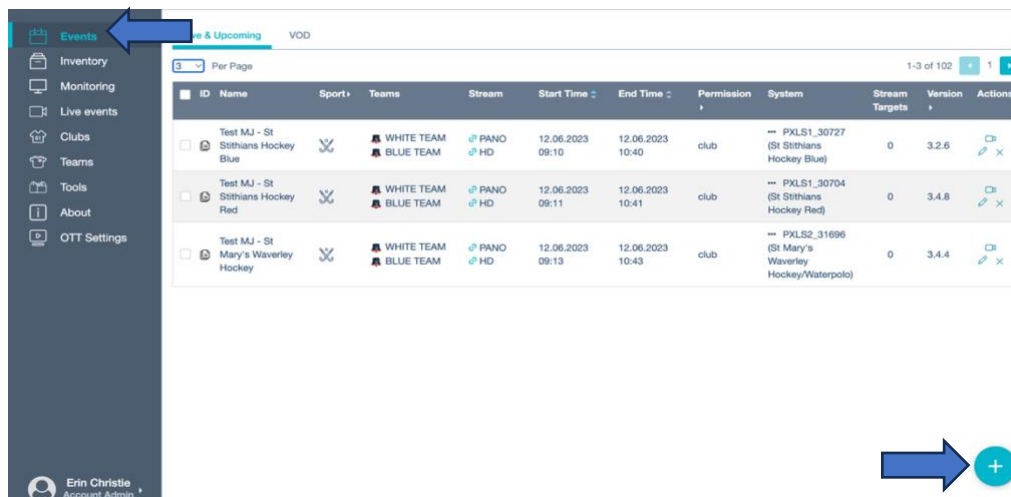

Once you have been granted access to the club, you will receive an e-mail from donotreply@pixellot.tv informing you that you are now admin of that specific club. You must click on "Accept Invite" which will take you to the CMS home page where you can create a new account, with a password of your choice, and accept the invite.

Once you have created an account, go to <https://club.pixellot.tv/> and log in with your new login details.

STEP 3: CREATING EVENTS

Once logged in to the CMS, you click on the events tab- on the left hand side- and then the plus sign on the bottom right. This will take you to an events creation page which you are going to fill in based on the information provided to you via the event allocation and event fixtures.

EVENTS CREATION PAGE

On the events creation page, the first thing you need to type in, is the name of the event.

NAME

The event name is always typed in using upper case and in the following format:

SPORT: AGE GROUP HOME TEAM VS AGE GROUP AWAY TEAM

Name
HOCKEY: U14A ST ANDREW'S VS U14A ST STITHIANS

This format is used for a standard fixture or derby fixture.

If your event is not a standard fixture but rather part of a festival, the festival name will be inserted at the end of the event name. This information will be provided in your event fixture e-mail.

SPORT: AGE GROUP HOME TEAM VS AGE GROUP AWAY TEAM – FESTIVAL NAME

Name
HOCKEY: U14A ST ANDREW'S VS U14A ST STITHIANS - ST MARY'S FESTIVAL

CLUB, VENUE, SPORT TYPE, GAME TYPE

Your club, venue and sport type are given to you on the event allocation. The game type will always be Game. It is extremely important to select the correct club. The SSS project often shares one camera between two sports (one winter and one summer sport). It is therefore important to make sure you've selected the correct club for the current sport associated with that camera. A good rule of thumb is to use the same sport in three different places:

- 1) Name – Categorizes the event on the front end.
- 2) Club – Groups events from the same sport at the same school together.
- 3) Sport Type – Dictates which AI tracking algorithm the camera should use. It also ensures the correct scoreboard link is made available.

Sport	Day	Camera Name	Club Name
HOCKEY	Tuesday	PXLS1_18103 (St Andrews Hockey)	St Andrews Hockey

General

1

Name
HOCKEY: U14A ST ANDREW'S VS U14A ST STITHIANS

☐ Unlisted event

Club
St Andrews Hockey

2

Venue
PXLS1_18103 (St Andrews Hockey)

Sport Type
Field Hockey

3

Game Type
Game

The start date will be the date of your fixture.

The start time will be the start time of the game.

The end date will be the date of your fixture.

The end time will usually be the start time of the next game.

Note: We always prioritize the end of a game over the start of the next game.

The Auto Production will always be set to Auto Camera. You select the home and away team based on your fixture information. You will always select the plain school/team name, the one that doesn't include an age group or any extra information. If one of your teams is not available to select, you need to send a WhatsApp to the "ITV Events Division" WhatsApp group, tag the school manager in your region, and request that the team be added.

11:45 ✓

Hi @Marina Meyer

Please can you add St Stithians College to Teams and Sub Categories

11:45 ✓

ADDITIONAL NAMING NOTES

TWO TEAMS FROM THE SAME SCHOOL/PROVINCE

If two teams from the same school/province are playing one another, the CMS will not allow you to select the same team name twice. You will therefore select the school/province name as the first team name, and for the second team name you will select “Team 1” with the SSS logo. On the day, when you open your scoring page, you will change the names of the teams so that the scoreboard shows the team names correctly.

The screenshot shows a 'Teams' section with two dropdown menus. The first dropdown, labeled 'Home Team', has 'ST JOHN'S DSG' selected. The second dropdown, labeled 'Guest Team', has 'TEAM 1' selected. Below these is a '+ Add Team' button. At the bottom, there are two text boxes for abbreviations: 'ST JOHN'S DSG Abbreviation' with 'ST JOHN'S U14 A' and 'TEAM 1 Abbreviation' with 'ST JOHN'S U14 B'.

CREATING EVENTS FOR PLAYOFF GAMES

When operating at tournaments, you will often receive fixtures for playoff games for which the teams playing depend on the outcomes of games still to be played. You won't know who is in the final, for instance, until the rest of the games have been played.

You can still create an event for these playoff games and just add “Team 1” and “Team 2” as placeholders until you know which teams are playing. You will also need to edit the event name with the correct teams playing once that information is made available to you.

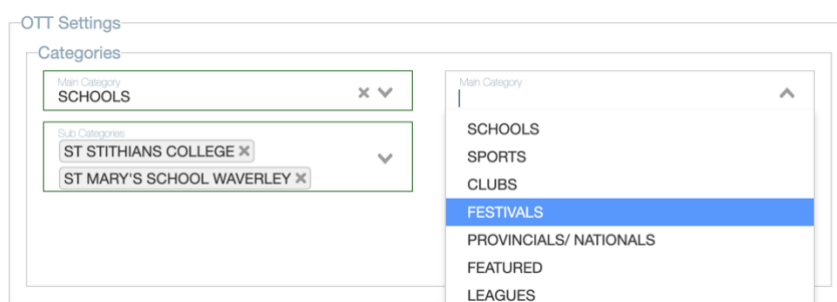

The screenshot shows two event creation forms. The first form has a 'Name' field with 'NETBALL: TEAM 1 VS TEAM 2 (5th/6th PLAYOFF) - USSA NETBALL 2023'. Below it, the 'Teams' section shows 'Home Team' as 'TEAM 1' and 'Guest Team' as 'TEAM 2'. The second form has a 'Name' field with 'NETBALL: NWU VS RHODES (5th/6th PLAYOFF) - USSA NETBALL 2023'. Below it, the 'Teams' section shows 'Home Team' as 'NWU EAGLES' and 'Guest Team' as 'RHODES UNIVERSITY'.

YOU WILL LEAVE OUT THE GAME SCORE SECTION.

Under **OTT Settings**, click the button “*add categories*”, and select your main and sub categories based on the fixture e-mail you were sent. You will always select **SCHOOLS** as a main category. The Sub category will be the names of the two schools playing. You will always select the school sub category that is plain and doesn’t include an age group or any extra information.

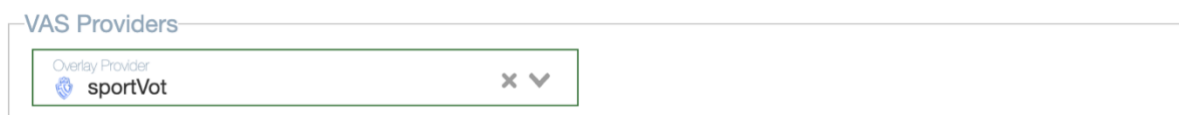

If the event is also a part of a festival/provincial tournament/league, you will add another main category with the name of this festival/provincial tournament/league as the subcategory.

You may need to request, on the “**ITV Events Division**” WhatsApp group, that something be added to Sub Categories. Tag the school manager in your request.

YOU WILL LEAVE OUT THE BETTING, STREAM FORWARDING AND SETTINGS SECTIONS.

Under the **VAS PROVIDERS** you select “sportVot”

YOU LEAVE OUT THE GRAPHICS SECTION.

At the bottom of the page you will now select:

“**Save**” – if you do not need to create more fixtures for the same club and venue.

Please post a message on the Operators WhatsApp group once you have created all your fixtures.

“Save and New” – if you are creating more fixtures under the same club and venue.

The “Save and New” option will autofill some of the information for you for your next fixture. You will just need to type in the new fixture name and start date and time.

NOTE: The Pixellot system requires a buffer of 3 minutes between fixtures. Your next fixture can therefore only be scheduled to start 3 minutes after the end of your last fixture. We always sacrifice the beginning of a game rather than the end of the previous game. If the next fixture is supposed to start at 17:00 but the previous fixture ends at 17:00, you will schedule the start of the next fixture for 17:03.

THE DAY OF YOUR EVENT

NB: On the day of your event, you will be communicating with the ITV Team via WhatsApp. Every message you send should start with your camera name. This helps the ITV Team respond to your messages as quickly as possible. It is best to have your camera name typed out somewhere so that you can just copy and paste it each time you send a message.

You are an operator representing ITV and our brand. Please make sure that you are dressed appropriately but also comfortably.

SETTING UP

1. Arrive at the venue at least an hour before the start of your first fixture for **fixed systems** and at least 2 hours before for **mobile systems**.
2. Make contact with your POC and:
 - a. Ask them to show you where the VPU (Vision Processing Unit) is. You will only need to access the VPU if there is a problem with the stream and the ITV Team needs your help to troubleshoot the problem. Some VPUs are in a locked case and you need a keybox code to gain access to the keys. If you need to access the VPU, you can ask for the keybox code on the WhatsApp group.

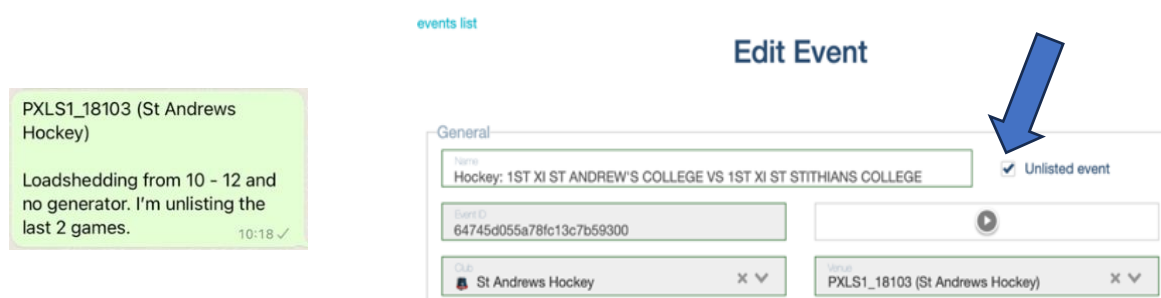

- b. Ask them for the internet/Wi-Fi details. If a Nashua router is being used, you can get the Wi-Fi name and password from the back of the router.

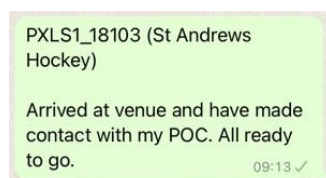

- c. If the fixtures you received don't stipulate the format of the games, ask your POC whether the teams will be playing halves or quarters (mainly applicable for hockey, waterpolo, netball and basketball).

- d. Reiterate the **importance of fixtures running on time** and ask them to keep you informed of any fixture changes/delays.
- e. Ask them for the loadshedding schedule for the day and if the venue has an alternative power solution. If there is going to be no power for some of your fixtures, you will need to unlist those fixtures on the CMS (see picture below) and post a message on the WhatsApp group.

Unlisting an event removes it from the front end – The SSS App and Website. It prevents viewers from getting frustrated watching a buffering/broken stream.

- f. Ask them to show you where you can set up.
3. Once you have made contact with your POC and have all the information you need, set up your laptop and connect to the internet. Let the ITV Support Team know that you're set up and ready to go.

4. Try and find the umpire/ref manager and introduce yourself. Make contact with as many umpires/refs as possible, explain your role, and ask them to make eye contact with you before blowing each game's start whistle.
5. Log in to the CMS and check the status of your camera by clicking on the **Monitoring** tab. It will show you a list of systems you're admin of and give you their current status. You can also use this tab to try and troubleshoot any streaming issues you might have.

This is what your system should look like up until about 15 minutes before the start of your first fixture.

Name	System	Live Streams	Stream Status	Status	Connection	Camera	Health	Cloud	CPU / GPU	HD / Pano	Actions
HOCKEY: U...	PXLS2_31696 (St Mary's Waverley Hockey/Water polo) VPU	03:22:18	-	Sleep	Connected	Good	-	-	Ok / Ok	Error / Error	▶

This is what your system should look like during any of your fixtures.

Name	System	Live Streams	Stream Status	Status	Connection	Camera	Health	Cloud	CPU / GPU	HD / Pano	Actions
Rhenish Ho...	PXLS1_32492 (Rhenish Hockey) VPU	HD Pano	●	Live	Connected	Good	Ok	Created	Ok / Ok	Ok / Ok	▶

This is what your system should look like between fixtures, but it should change to the second picture once the fixture goes live. If it doesn't, inform the ITV Support Team.

Name	System	Live Streams	Stream Status	Status	Connection	Camera	Health	Cloud	CPU / GPU	HD / Pano	Actions
HOCKEY: U...	PXLS1_19616 (St Stithians Hockey Red) VPU	Unavailabl e	-	Reset	Connected	Good	Error	Created	Ok / Ok	Error / Error	▶

If, at any stage, the status of your system is different to what you're supposed to be seeing – as shown above – please pop a message on the WhatsApp group and state the deviation you've observed.

For example: If the network is slow, the system will struggle to push the panoramic feed and your system will look like the picture below while it is live. This isn't a major issue but is worth informing the ITV Support team about.

Name	System	Live Streams	Stream Status	Status	Connection	Camera	Health	Cloud	CPU / GPU	HD / Pano	Actions
Test Event ...	PXLS2_61449 (Monnas Netball) VPU	HD Pano	●	Live	Connected	Low FPS	Ok	Created	Ok / Ok	Ok / Error	▶

PXLS2_61449 (Monnas Netball)

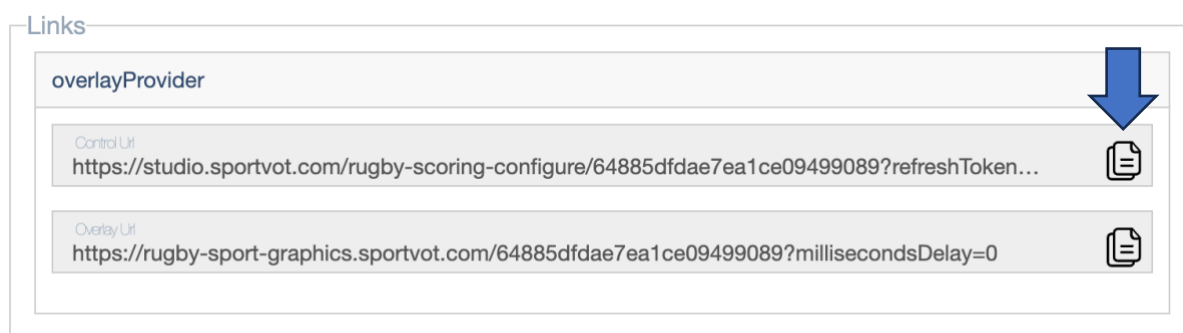

Currently live and the monitoring status is showing an error with the panoramic feed.

15:03 ✓

BASIC SCORING

Accessing sportVot (the scoring and graphics system)

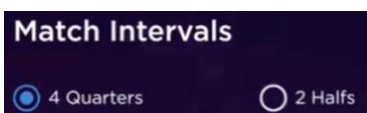

1. Log in to the CMS and click on the pencil (edit) button of your first event.
2. Scroll down to the **VAS Providers** section and click on “*overlayProvider*”. Two links will appear underneath.
3. Press the **first link’s** copy button and paste the link into a new web tab. *You do not need the second link.*

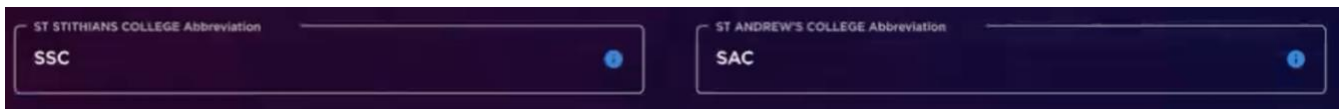

4. Your scoring page should open and look like the picture below – showing your two schools’ emblems and names. Make sure **basic scoring** is selected and click on the single theme shown at the bottom of the page and then the **select theme** button.

5. Based on the fixtures you received, or the information you gathered from your POC, you will select the format of the game if given an option to do so. For hockey, you will have the choice between 4 quarters or 2 halves.

6. Change the provided abbreviations to something more appropriate (see example below). This is the name that will appear on the screen scoreboard. If you are unsure of what abbreviation to use – pop a message on the WhatsApp group and ask.

ST STITHIANS COLLEGE Abbreviation: SSC

ST ANDREW'S COLLEGE Abbreviation: SAC

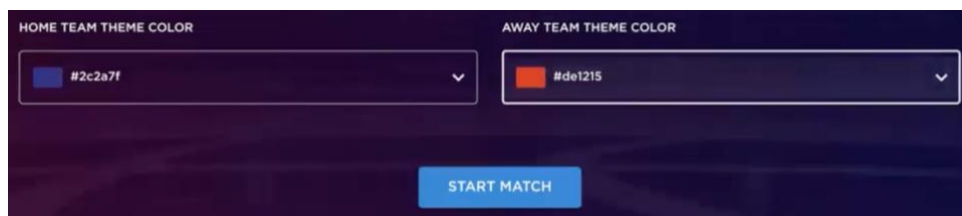

changed to

ST STITHIANS COLLEGE Abbreviation: ST STITHIANS

ST ANDREW'S COLLEGE Abbreviation: ST ANDREW'S

7. You are not required to, but if you would like to, you are welcome to select colours for the school teams. These colours obviously need to match – as closely as possible – the colours that the teams will be wearing.

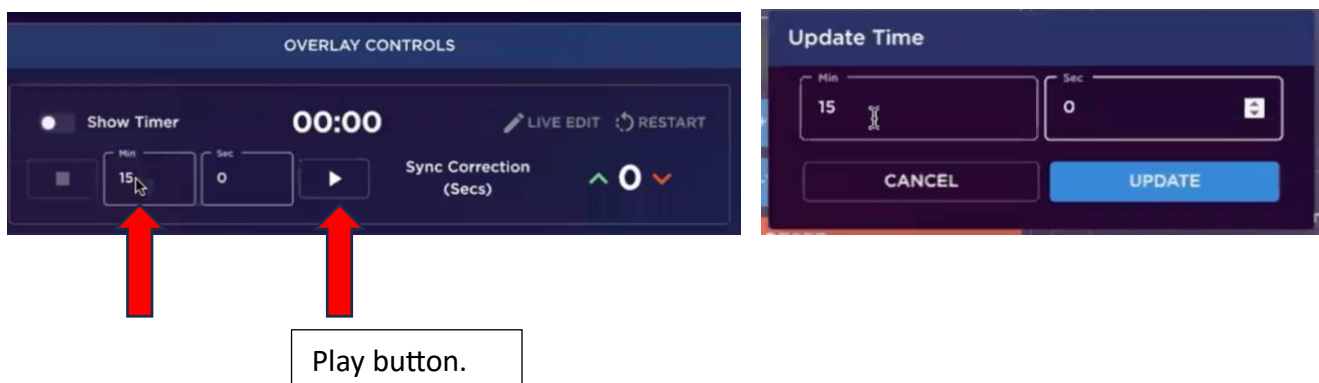

HOME TEAM THEME COLOR: #2c2a7f

AWAY TEAM THEME COLOR: #de1215

START MATCH

8. You then select the “**Start Match**” button. Each scoreboard will look different – depending on the sport being played.

9. You can adjust the time of a half/chukka by clicking on the time on the RHS of the screen. This will open the “Update Time” tab

OVERLAY CONTROLS

Show Timer: 00:00

Min: 15 Sec: 0

Sync Correction (Sec): 0

Update Time

Min: 15 Sec: 0

CANCEL UPDATE

Play button.

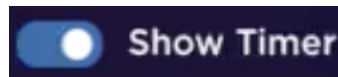

10. Make sure that “Use Auto Ads” is toggled to on.

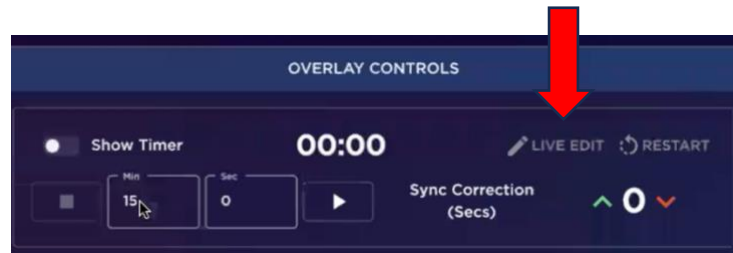

AUTOMATION

Use Auto Ads

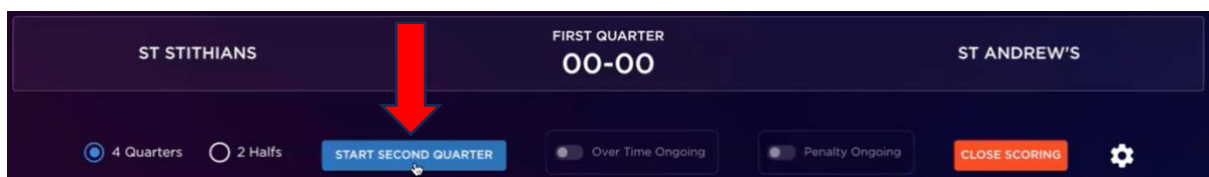

11. Once the game start whistle blows, you click the “**play**” button next to the time. Please ensure that the “**show timer**” button is toggled to on.

*It is unrealistic to expect the timer to be correct to the second, but it should be as close as possible. If your timer is out by more than a minute, you can live edit the time by clicking the “**live edit**” button where you can adjust the time as desired.*

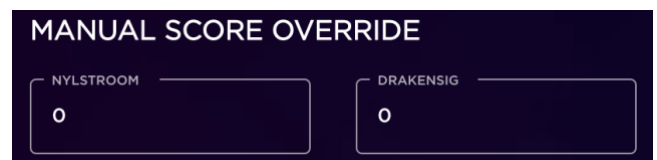

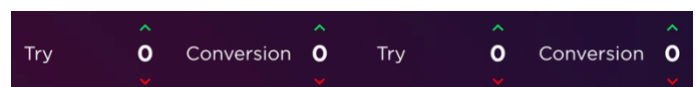

12. Once the chukka/half break is over you click on the “**Start Second Quarter/Half**” button.

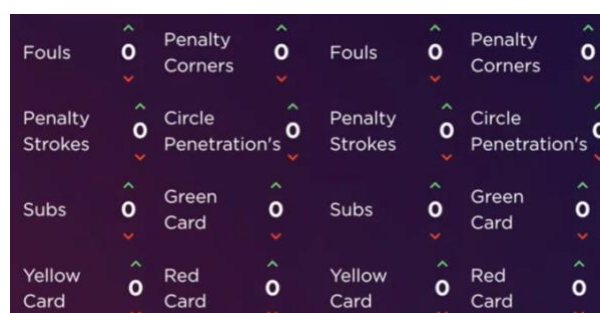

You can also change the 4 quarters to 2 halves if you initially made a mistake.

13. You add/remove team goals/points using these parts of the scoring webpage (depending on the sport). There should be a physical scoreboard at the field to help you keep track of the points.

14. You **do not** need to fill in anything on this section of the scoring webpage.

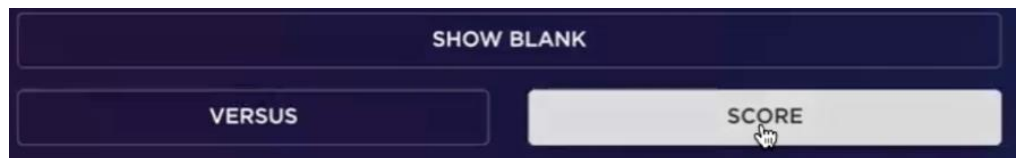

15. On this part of the scoring webpage you will only be selecting **Score** and **Versus** (unless told otherwise by the ITV Support team)

During the live action, **Score** must be selected.

During a chukka or half time break, you can select **Versus** (but you are not required to do so).

Don't forget to change back from Versus to Score when the action starts again.

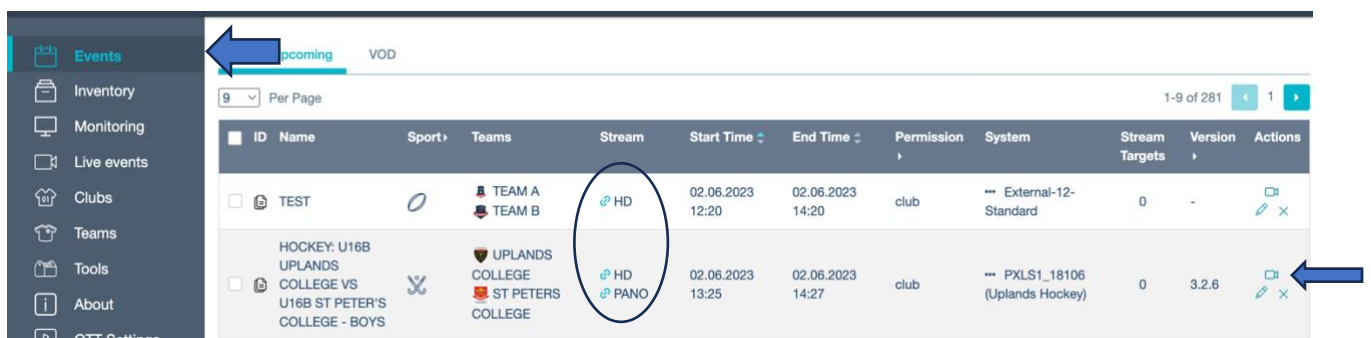

16. Once the game is over you can select **CLOSE SCORING** or just close the tab. You will need to reopen the scoring tab for your next game by copying the link in the next game's event.

MONITORING YOUR STREAM

Once your event has gone live, you are expected to monitor your feed every 10 minutes or so. To do this you go to the Events tab.

1. Find your event and click on the camera button on the RHS of your event.

Note: If the internet is poor, your stream will only be pushing HD and it will not say PANO. Inform the ITV Support Team.

PXLS1_18106 (Uplands Hockey)

Only HD stream is being pushed.
No Pano stream.

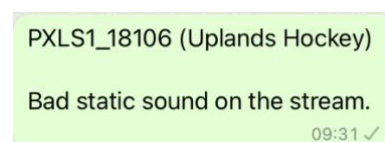

14:12 ✓

2. Your stream will now pop up for you to be able to monitor what is streaming to the SSS App. When monitoring you are making sure that:
- a) The camera is tracking properly.
 - b) The scoreboard and SSS logo are showing.
 - c) The sound quality is good – there is no static sound coming through.

Note: There will be a delay of about 45s between the live action and your stream.

If the SSS Logo or scoreboard are not showing on your stream you can try resetting the graphics (see the “Graphics Issues” section under **Troubleshooting**). Let the ITV team know. If there is static sound, you must also pop a message on the WhatsApp group and inform the ITV Support Team.

FINISHING UP

Once all your events for the day are finished, please complete the **Event Feedback Form** which you can find a link to in the WhatsApp group description. If you accessed the VPU during the event, please make sure that it is closed and secure again. You can then pack up your things, pop a message on the WhatsApp group and go home 😊

PRESETS AND THE MANUAL SCOREBOARD

Sometimes the sporting action only takes place on half of the designated sporting field. This is usually when younger age groups are playing mini-games, or when a game has gone to shootouts/strokes (hockey) or penalties (soccer). The ITV Support Team will add PRESETS to the camera which overrides the AutoProduction/AutoTracking and allows the system to focus on only one half of the field.

You select which half it focuses on by choosing a preset on the manual scoreboard. You will either be told which half to focus the camera on, or you will choose the half that gives the best view or has the best game being played.

The most important thing to remember when selecting a preset is that you are selecting it based on the orientation of the CHU. It is therefore best to sit on the SAME side as the CHU so that you are looking at the field from the same perspective as the CHU. This will mean that your "right" is also the preset right - and same for the left hand side.

To access the manual scoreboard you:

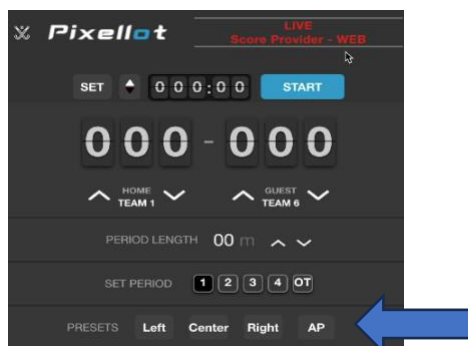

1. Find your event and click on the edit "*pencil*" button.
2. You then scroll down to the bottom of the **Graphics** section where you will find the **Manual Scoreboard Link**.
3. You copy the link- using the copy button- and paste it in a new web tab. The Manual Scoreboard will load.

The screenshot shows a form with three input fields. The first field is labeled 'Ticker Text' and contains the placeholder 'Enter Live ticker text here'. The second field is labeled 'Manual Scoreboard Link' and contains a long URL: 'https://msb.prod.pixellot.tv/?wss=wsp.prod.pixellot.tv&port=443&token=eyJlbmMiOiJBMTI4Q0JDLUhT...'. To the right of the URL are two icons: a document icon and an envelope icon. A blue arrow points down to the 'Manual Scoreboard Link' field. The third field is labeled 'Event location' and is currently empty.

**Note: You only use the manual scoreboard to select the preset.
You score using the usual SportVot scoring link.**

4. At the bottom of the Manual Scoreboard, you select the preset you are going to use. You will be asked if you are sure about your chosen preset – you click "ok".

5. Once you have selected the preset, you can close the manual scoreboard link and **continue running the event as normal.**

TROUBLESHOOTING

If anything out of the ordinary happens while you are busy streaming, be it technical or not, pop a message on the WhatsApp group. The sooner we can deal with issues, the better. Over communicating is better than under communicating. ***Remember to include your camera name in all messages.***

Below is a list of common errors that could occur on the day.

TIMING ADJUSTMENTS

Remember, there is a 10-minute block before the start of an event. This means that you can adjust the event start time up to 10 mins before the start of the event. If you are within 10 minutes of the event start time, the start time cannot be adjusted. The end time of an event can be adjusted up to 1 min before the end of the event.

FIXTURES STARTING EARLY

If a fixture has been moved to start earlier than the original time, there are two scenarios that can occur:

- a) You become aware of the earlier start time outside of the 10-minute block
Due to this change being outside of the 10 minute change block, you can simply adjust the start and end times of your fixtures. You will work from the ***first fixture, down to the last fixture.***
- b) You become aware of the earlier start time within the 10-minute block
There is nothing that can be done. The beginning of your first event will be missed. You can, however, adjust the start and end times of the games to come.

FIXTURES STARTING LATE

If the first fixture of the day has been moved to start later than the original time, there are two scenarios that can occur:

a) You become aware of the later start time outside of the 10-minute block

You can adjust the start and end times of your fixtures, but you will need to work **backwards-from the last fixture up**. If you work from the top, down, the fixture times will overlap, and your events may get deleted.

Example: If you're about to stream the U16D game below, and the POC informs you that the game scheduled to start at 15:00 will now only start at 15:15. The POC informs you before 14:50 and so you are outside of the 10-minute block.

Before editing the start and end time of the first game, you will work backwards from the last fixture up - and adjust each time by the 15 minute change.

ID	Name	Sport	Teams	Stream	Start Time	End Time	Permission	System	Stream Targets	Version	Actions
☐	HOCKEY: U16D ST STITHIAN'S VS U16D PARKTOWN		ST STITHIANS COLLEGE PARKTOWN BOYS HS	01:58:33	02.06.2023 15:00	02.06.2023 16:00	club	... PXLS1_30727 (St Stithians Hockey Blue)	0	-	
☐	HOCKEY: U16C ST STITHIAN'S VS U16C PARKTOWN		ST STITHIANS COLLEGE PARKTOWN BOYS HS	03:01:33	02.06.2023 16:03	02.06.2023 17:00	club	... PXLS1_30727 (St Stithians Hockey Blue)	0	-	
☐	HOCKEY: U16B ST STITHIAN'S VS U16B PARKTOWN		ST STITHIANS COLLEGE PARKTOWN BOYS HS	04:01:33	02.06.2023 17:03	02.06.2023 18:00	club	... PXLS1_30727 (St Stithians Hockey Blue)	0	-	

1. You will first adjust the start and end times of the last game scheduled, the u16B game. The game will be adjusted to start at 17:18 and end at 18:15.
2. You will then adjust the second last game scheduled, the u16C game. The game will be adjusted to start at 16:18 and end at 17:15.
3. Lastly you will adjust the first game's start and end time by 15 minutes. It will be set to start at 15:15 and end at 16:15. You work from the last fixture backwards.

b) You become aware of the later start time within the 10-minute block

You will follow the same process as above, working **backwards- from the last fixture up**. You will adjust the start and end times of all your upcoming fixtures except the first fixture. You will not be able to adjust the start time of your first fixture due to the 10-minute block. You will, however, be able to adjust its end time.

Unlist the first fixture and adjust its end time so that it ends 1 minute after the start time. If it has already gone live, then unlist the event and adjust the end time so that it ends in 1 minute time. Once the first fixture has ended, you will then need to recreate an event for the first fixture using the new start and end times.

FIXTURES RUNNING LATE

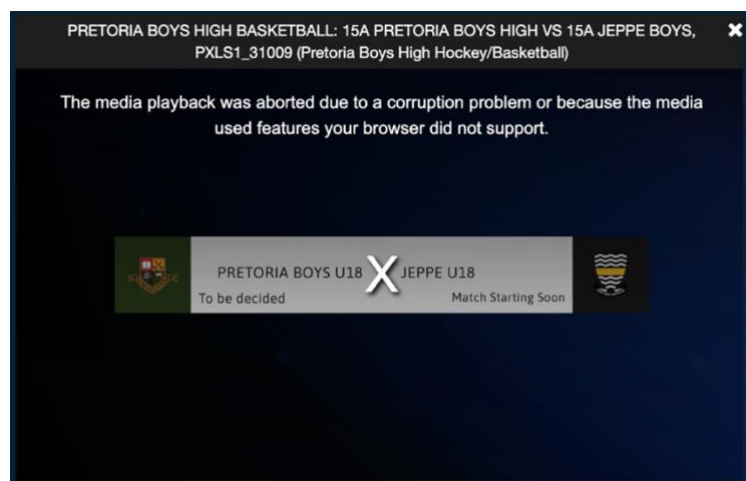

At half time of each game, check whether the fixtures are running on time and make a decision to adjust the start times of the games to come, and the end time of the current game. ***Remember, we always prioritize the end of games rather than the beginning of the next game.***

Work backwards from the last fixture up and adjust the start and end times of the fixtures based off the time delay. If, at half time, you notice that the U16D game below is running 10 minutes late due to an injury, you will start your time adjusts from the last game (U16B game) upwards.

ID	Name	Sport	Teams	Stream	Start Time	End Time	Permission	System	Stream Targets	Version	Actions

☐	HOCKEY: U16B ST STITHIAN'S VS U16B PARKTOWN		 ST STITHIANS COLLEGE  PARKTOWN BOYS HS	04:01:33	02.06.2023 17:03	02.06.2023 18:00	club	--- PXL1_30727 (St Stithians Hockey Blue)	0	-	 

1. You will first adjust the start and end times of the last game scheduled, the u16B game. The game will be adjusted to start at 17:13 and end at 18:10.
2. You will then adjust the second last game scheduled, the u16C game. The game will be adjusted to start at 16:13 and end at 17:10.
3. Lastly you will adjust your current game's end time by 10 minutes. It will be set to end at 16:10. You work from the last fixture backwards.

INTERRUPTED/POOR QUALITY STREAM

Edit Event

ST XI ST STITHIANS COLLEGE

☒ Unlisted event

PXL51_18103 (St Andrews Hockey)

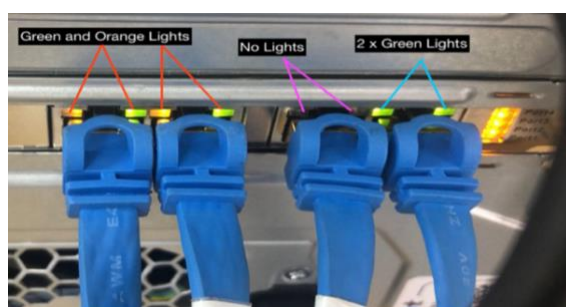

There are a variety of causes that could lead to an interrupted or poor-quality stream. If your stream has been interrupted or you deem the stream to be of poor quality, try and refresh your page. If the problem persists for about 5 minutes, unlist your event and pop a message on the WhatsApp group to inform the ITV Support Team. The ITV Support Team will most likely ask you to check the VPU for power and internet.

Checking the VPU for Power and Internet

One of the first points of troubleshooting a disruption to your stream is checking whether the VPU and CHU (Camera Head Unit) are powered up and have a strong internet connection. You need access to the VPU to do this. You should have, as you arrived at the venue, located the VPU and made sure you could access it.

Once you have access to the VPU you are going to look at the ports at the back of the machine. If you see any lights, it means that the VPU and CHU have power.

You now need to locate the PoE ports which connect the CHU to the VPU. You need to analyse the colours of the PoE port lights (see picture below) and inform the ITV Support Team of what you see. It would be even better if you could send the ITV Team a picture/video of what you see.

Green and Orange – internet connection of 1 Gbps

Green and Green – internet connection of 100 Mbps

No lights – no connection

Ideally you want all connections showing the green and orange light connection.

PXLS1_31005 (Cornwall Hill College Hockey)

Checked the VPU - no lights showing.

15:58 ✓

PXLS1_31005 (Cornwall Hill College Hockey)

Checked the VPU - only green and orange lights at one connection. The another connections have no lights.

15:59 ✓

PXLS1_31005 (Cornwall Hill College Hockey)

Checked the VPU - 3 connections showing green lights. 1 connection showing no lights.

16:00 ✓

Based on the information you provide the ITV Support Team, they will instruct you on what your next steps should be. See the table below with common instructions from the Support Team.

Reboot the VPU

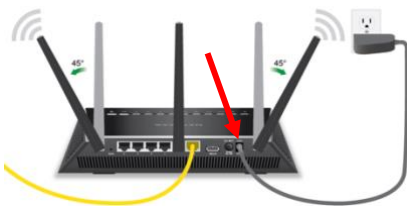

Hold down the power button on the front of the VPU for at least 3 seconds.

Unplug the VPU

Remove and replace the power cord from the back of the VPU.

Reboot the router

Hold the on/off button in for at least 3 seconds.
OR
Remove and replace the power cord from the back of the router.

GRAPHICS ISSUES

No Scoreboard or SSS Logo

If, at any stage, your scoreboard disappears during a live event you are going to reset the graphics in the VPU Manager.

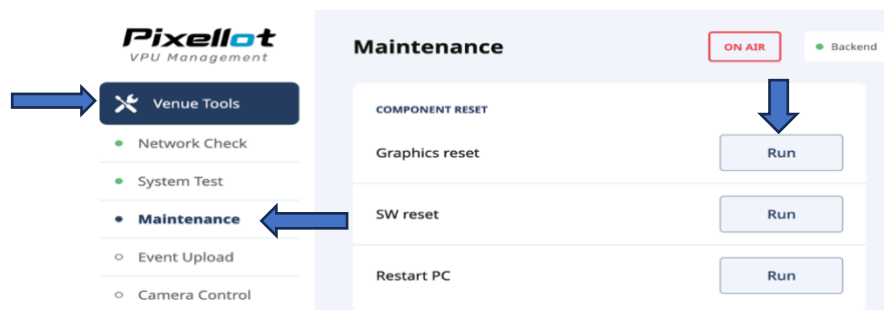

You do this by:

- 1) Clicking on the **Events** tab in the CMS and finding your event.
- 2) Click on the three buttons next to the camera name. This will open a box above the camera name.
- 3) In this box, you are going to click on **VPU**. This will open another web tab called **VPU Manager**.

IMPORTANT: Please do not fiddle with things in the VPU Manager that you do not understand.

- 4) Once the **VPU Manager** has loaded you are going to click on **Venue Tools** tab and click on the **Maintenance** sub tab.
- 5) Here you are going to click on **Graphics Reset** which will reset the graphics and your scoreboard should reappear.

If the scoreboard/graphics have still not reappeared, please let the ITV Support Team know by sending a message on the WhatsApp group – include your system name in the message.

PXLS1_18106 (Uplands Hockey)

Tried to reset the graphics - but still no scoreboard showing.

09:40 ✓

Incorrect name on top of the score bug or sponsorship issues

If you receive a complaint about anything sponsor related on your stream - or if you notice that the name on top of the score bug is incorrect - send a WhatsApp message to the **"ITV Events Division"** group and tag @Mitch and @Avela.

SCOREBOARD TIMER SYNC ERROR

If this error occurs, you need to ensure that your laptop's time and date settings are set to "automatic". The below steps are a guide on how to do this - but please note that the steps may vary slightly depending on your operating system version and the specific interface of your laptop.

Windows:

1. Click on the "Start" button and open the "Settings" app (gear icon).
2. In the Settings window, click on "Time & Language."
3. Under the "Date & Time" section, toggle the "Set time automatically" and "Set time zone automatically" options to the "On" position.
4. Windows will now synchronize your system time and time zone with the internet servers.

macOS:

1. Click on the Apple menu in the top-left corner of the screen and select "System Preferences."
2. In the System Preferences window, click on "General" and then "Date & Time."
3. Ensure that the checkbox for "Set date and time automatically" is checked.
4. macOS will automatically synchronize your system time with the internet time servers.

Linux (Ubuntu):

1. Click on the system clock located in the top-right corner of the screen.
2. Select "Date & Time Settings" or "Time & Date Settings."
3. In the Date & Time Settings window, toggle the "Automatic Date & Time" and "Automatic Time Zone" options to the "On" position.
4. Ubuntu will now use the internet time servers to set the system time and time zone automatically.
